Thomas Allweyer

BPMN 2.0

Introduction to the Standard for Business Process Modeling

2nd, Updated and Extended Edition

Contents

1 BPMN – A Standard for Business Process Modeling 9
1.1 Why a Notation? 9
1.2 Development of BPMN 10
1.3 Contents of BPMN 2.0 11
1.4 Business-Level Models and Executable Models 12
1.5 About this Book 13
2 BPMN by Example 15
2.1 A First BPMN Model 15
2.2 BPMN Constructs Used 15
2.3 Sequence Flow Logic 17
2.4 Presentation Options 19
2.5 Appending Additional Information 22
3 Gateways: Splitting and Merging 23
3.1 Exclusive Gateway 23
3.2 Parallel Gateway 26
3.3 Different Process Instances at a Parallel Join 27
3.4 Inclusive Gateway 30
3.5 Complex Gateway 33
4 Splitting and Merging without Gateways 35
4.1 Splitting without Gateways 35
4.2 Merging without Gateways 38
4.3 Modeling with or without Gateways? 41
5 Collaborations 46
5.1 Example of a Collaboration 46
5.2 Modeling Message Flows 48
5.3 Message Flows to Black Box Pools 50
5.4 Private and Public Processes 52

5.5 Multi-Instance Participants 54
5.6 Use of Collaborations and Sequence Flows 55
5.7 Modeling Message Contents 57
6 Events 58
6.1 Example of the Use of Events 59
6.2 Start Events 62
6.3 End Events 68
6.4 Intermediate Events 71
6.5 Event-Based Decisions 76
7 Activities 80
7.1 Sub-Processes 80
7.2 Loops and Multi-Instance Activities 85
7.3 Ad-hoc Sub-Processes 89
7.4 Types of Tasks 90
7.5 Calling Processes and Global Tasks 91
7.6 Examples of Sub-Processes and Called Processes 96
8 Handling Exceptions 99
8.1 Interrupting Intermediate Events 99
8.2 Non-Interrupting Intermediate Events 101
8.3 Handling of Errors 103
8.4 Escalation Events 104
8.5 Event Sub-Processes 109
9 Transactions and Compensations 113
9.1 Modeling of Transactions 113
9.2 Direct Call of Compensations 118
9.3 Event Sub-Processes for Compensations 119
9.4 Use of Exceptions, Transactions, and Compensations 120
10 Data Objects in Processes 122
10.1 Modeling Data Flow 122
10.2 Multiple Data Objects 124

10.3 Data and Events 124
10.4 Data Stores 125
10.5 Passing Data to Called Activities 125
10.6 Use of Data Objects 127
11 Choreographies 128
11.1 Choreography Diagrams 130
11.2 Choreography within Collaboration 133
11.3 Choreography Sub-Processes 133
11.4 Gateways in Choreographies 135
11.5 Events in Choreographies 135
11.6 Calling Choreographies and Global Choreography Tasks 136
11.7 Use of Choreographies and Collaborations 137
12 Conversations 138
12.1 Conversation Diagrams 138
12.2 Message Correlations 139
12.3 Hierarchies of Conversations 140
12.4 Calling Global Conversations and Collaborations 141
12.5 Use of Conversation Diagrams 142
13 Artifacts and Extensions of BPMN 143
13.1 Artifacts 143
13.2 How to Extend BPMN 144
14 BPMN Modeling Patterns 146
14.1 Four Eyes Principle 146
14.2 Decisions in Sub-Processes 148
14.3 Tasks with Multiple Actors 149
14.4 Parallel Checks 152
14.5 Process Interfaces 154
14.6 Synchronizing Parallel Paths 155
14.7 Requests with Different Types of Replies 157
14.8 Processing Cancelations 159

14.9 Deadline Monitoring 159
14.10 Dunning Procedure 160
14.11 Call for Proposals 161
A Bibliography 163
B BPMN in the Internet 165
Index 166
